Dustin:

I do not think that is a problem, because a lot of conferences video the talks. This is not the NIST conference. We go with what they planned.

(When we organize NIST conferences, whether to provide records become a big deal since we need to make sure it is accessible for the people who have hearing problems.)

Subject: pqcrypto video recording

Lily,

PQCrypto regularly videos the talks. Are we fine with having our announcement talk (and Q&A session) recorded? It's fine with me, although maybe we don't want it recorded in case I say something that may come back and bite us later.

Thanks,
Dustin
