Aren't Paulo Barreto and Anderson Nascimento in Tacoma now? (Oh, I see that they are the organizers.) Anderson is more into information theoretic security, if I remember, and Paulo into post-quantum. I think that Anderson is getting into post-quantum right now, too, and I think that it's likely that there will be somewhat more attention paid to pq for this conference. I can ask them what their guess is about the extent to which pq will be a topic.

Cheers,
Daniel

Subject: FW: Conference information from Allen

If anyone is interested, this conference appears to be more quantum cryptography than post-quantum cryptography. However, last year it looks like they did have 3 PQC talks.

Dustin

Subject: RE: Crypto Reading Club - Slides - Post Quantum Crypto talk

Hi Meltem,

Thank you for sending out the slides. They are quite interesting.

The slides make a reference to one conference in Japan that is scheduled for later this month. I do not know if you heard of another conference, to be held later in the US just before Crypto 2016, that is also, to a large extent, dedicated to the topic of quantum computing. <http://www.icits2016.com/>.

I attended the 2015 conference and heard a number of informative and inspirational talks there.

Lily, maybe someone from your group will be interested in attending.

Regards,

Allen
