Hi Matt,

For ICMC, it turns out that ALL government speakers do not have to pay a registration fee. You should have received an confirmation email from Nikki Principe with a registration code. I received mine on 2/24/16 and the code is **SPKTHANKS**.

I don't know if everyone gets the same code or not. If you can't find your confirmation email, you can try using my code and see what happens.

Also in the confirmation email was this:

Speaker Release: We ask that you confirm your intention to participate by completing this commitment and release form:

https://docs.google.com/a/cnxt.com/forms/d/1TM1e5t1BR1fZ5pX_84rnq-0YrtxDAOrmYYOrNpLJ0PM/viewform

Hope this helps!

Jen

Hi Matt,

I talked to one of the executive planning committee members this morning. She is going to look into allowing you and Mary to not have to pay the registration fee.

If she does not get approval to waive the fee for both of you, then one of you is free and the other is 50% off.

I should hear something today or tomorrow.

Jen,

Should I register?

Expert Keynotes Will Set the Tone for an Expanded Six-Track Conference

ICMC is proud to feature 77 speakers, and 72 sessions with expanded international participation, and new conference content. As always, the conference is built on quality content for those who produce, use, and test cryptographic modules, with a special focus on standards such as FIPS 140-2, ISO/IEC 19790, and Common Criteria.

[Register Now](#). 40% off early registration rate

in effect. Save \$440. Expires April 6. Join the year's leading crypto event this spring.

This year, the conference has expanded by 44% with new tracks and keynotes. As an attendee, you'll be able to create your own conference agenda from multiple sessions. Each of six tracks being presented will kick off with the incisive keynote sessions listed below. These high-level speakers will provide a range of perspectives on current challenges in commercial cryptography, and will set the tone for entire program.

Certification Programs Track

Overview of ISO 19790:2012 Revision

Randall Easter, Computer Security Division, STVM, NIST

General Technology Track

Modern Crypto Systems and Practical Attacks

Najwa Aaraj, Vice President, Special Projects, DarkMatter

Advanced Technology Track

Quantum Computing Current Research & Standards for Quantum Safe Cryptography

Mark Pecen, CEO, Approach Infinity

End-User Experience Track

Worlds Collide: Are We Ready for Security at Warp Speed?

Jon Geater, CTO, Thales e-Security

Common Criteria and Crypto Track
**Securing Mobility through the Canadian
Medium Assurance Solutions Program**

Greg Hills, Director, Architecture & Technology
Assurance, Communications Security
Establishment (CSE)

Industry Vertical/Embedded Crypto Track
Track Keynote (Title to Come)

Matt Landrock, CEO, Cryptomathic

Join the Leaders in Ottawa
as ICMC grows into an
expanded international
venue, with a new late
spring timeframe that
avoids conflict with other
major industry events.
