---

Jim,

Thanks. I added a disclaimer, and updated the pdf in the nike database. The file is also attached if you need it.

Dustin

Hi Dustin-

I'll be taking your paper to WERB this week. Since it mentions a commercial product (Intel Core i7 processor), you'll need to add a commercial product disclaimer. Please let me know if you agree to this.

BTW, here are a couple of example disclaimers, in case you need one. Feel free to use as-is or tailor to your specific needs:

Any mention of commercial products or organizations is for informational purposes only; it is not intended to imply recommendation or endorsement by the National Institute of Standards and Technology, nor is it intended to imply that the products identified are necessarily the best available for the purpose.

The identification of any commercial product or trade name does not imply endorsement or recommendation by the National Institute of Standards and Technology, nor is it intended to imply that the materials or equipment identified are necessarily the best available for the purpose.

Certain commercial entities, equipment, or materials may be identified in this document in order to describe an experimental procedure or concept adequately. Such identification is not intended to imply recommendation or endorsement by NIST, nor is it intended to imply that the entities, materials, or equipment are necessarily the best available for the purpose.

Jim
