Thanks – I'll take a look and let you know if I have any questions.

Subject: Re: Just checking in

I finished and updated the checklist files. I put comments in where I thought something should be conveyed back to the author or to note the problem for us. I put green 'Y' or 'N' to indicate that something was good or bad. I guess I should have put 'N/A' on some things, but thought of it too late. For example, if someone didn't have "Additional Implementation" or "KAT for Tables" I put 'N', but it's not really a problem. The overall "grade" for the section should indicate that the section is ok.

When I went to update the master spreadsheet it didn't go so well so feel free to update that. I made an additional comment on ThreeBears. It was on my list, but Jacob had already reviewed it. I just added the comment in green font about how they didn't quite adhere to the API.

Perfect. Thanks.

What do you think of Dan's PQ RSA Kat files? I assume we don't want 10x more...

FYI, I've reviewed just about everything on my list. This weekend I will enter the data on the sheets. Should have the stuff there when you get to work on Monday.

Larry,

I haven't seen any completed checklists you've done. Just wanted to make sure you're planning on doing them (hopefully pretty soon)?

Dustin
