Ray,

Can I get you to take a look at some of the comments and try to edit as needed?

- A comment in 3.2.1
- The paragraph in Kyber that has a million comments
- Some sporadic comments in BIKE, CM
- For Saber, you mention rounding to Z_T and Z_q . I think it should be Z_T and Z_2 . Can you confirm?
- Daniel ST also added several comments in the cost models section in the appendix. You might want to see what he commented on.

Thanks,

Dustin
