Maybe we could co-locate with ACM CCS, which is happening November 7-11, 2022 in Los Angeles? See here: https://www.sigsac.org/ccs/CCS2022/ . Not sure if this is a good idea, though.

Hi Dustin and all,

I will need to travel to IETF115 if my travel is approved at that time on November 3rd.

I prefer the latter date.

Thank you,
Quynh.

Subject: PQC workshop dates

All,

Sara was checking available dates (to not overlap other conferences, and availability of NIST conference services). Around November, there are 2 possible dates: Nov 1 - Nov 4, as well as Nov 28 - Dec 2. She also pointed out that holding a physical event at NIST would be trickier for lunch, as the cafeteria won't be open. Co-locating could be possible, but is costlier.   Any thoughts?

Dustin
