Hey Matt,

Did you decide on a topic and/or speak to any potential authors about the two possible topics for the next bulletin?

- securely sending files over email (not a publication)
- are you quantum ready?? (not a publication)

I'd like to reach to the author, before I leave for two weeks, to see if they can begin the writing process.

Sara

G2 no longer does the bulletins – it's usually the author of the SP/NISTIR – OR – the person running the project.

If you have a POC, I can reach out to them!
Sara

Can we do a bullerin on something new? We have to do a short doc on securely sending files over email so it's not based on an existing doc. We kind of know the content. I don't know if that is in scope of the work for G2.

Hi Matt,
Due to the lack of SPs/NISTIRs being published during the summer, the last ITL bulletin was published in April.   A couple pubs were recently published that could kick off a September bulletin

7/31/19 published	**NIST SP 1800-17-**Multifactor Authentication for E-Commerce: Risk-Based, FIDO Universal Second Factor Implementations for Purchasers	Bill Newhouse
8/7/19 - published	**SP 800-204:** Security Strategies for Microservices-based Application Systems	R. Mouli

OR, Kerry's TLS document should be published very soon:

8/7/19 - WERB approved	**SP 800-52 Revision 2,***Guidelines for the Selection, Configuration, and Use of Transport Layer Security (TLS) Implementations*	Kerry McKay, David Cooper

Thoughts?

Sara
