The submission deadline was Dec 1st. We told them they could give us the hard copies of the statements at our workshop in April.

Many teams included scanned version with their submissions, but it wasn't required. After we received all the hard copies, we reviewed them, scanned them, and posted them on our project website. We were clear with submitters that we would do this.

That's correct. The first conference was relatively close to the algorithms announcement. Also, and we can check on it, I think they sent an electronic version of IP statement, but the official signed copy was delivered at the workshop. I'll Cc Dustin on this.

The PQC project had a workshop at the beginning of the process for submitters to introduce their algorithms. Our first workshop is not until November. I was not considering this as an option.

Subject: IP statements

Hi,

Florian sent me an e-mail over the weekend, asking me about IP statements.

Apparently, the PQC competition allowed submitters to hand in these statements during the first workshop.

Is this correct? And are we considering a similar option for the LWC submissions?

Regards,

Nicky
