"last call" = Arkansas hardware dudes?

Well, you know.. yes.. >_>

From my perspective, I would like to ensure that PriVerify's team is working on something that contributes to our measurements, assuming they do something with us..

I can wait to hear back from his technical experts to see if it's useful. He has my email contact at least.

The guy we were talking to seemed less technical than the folks we were talking to on the last call. Made it difficult to determine what they could actually do.
