Hi, John,

You can start to plan. Contact BSI and Stefan and get the dates determined to generate a spreadsheet.

Thanks,

Lily

Subject: Workshop in Jena, January 2020

Lily,

I was invited to come to a workshop on quantum random number generation run by BSI, in Jena, Germany. I'd like to plan to combine this with a visit to Bauhaus University in Weimar (I'm working on some research with Stefan, and Weimar is a half-hour train ride from Jena) and maybe also with a visit to BSI to keep working on coordinating AIS-20/31 and SP800-90. The workshop is January 23-24.

Thanks,

--John
