---

Thanks! I will ask Prof. Jim Franson to do so.

Xiao

**Subject:** student search and potential theory postdoc

Hi Ron, Yi-Kai;

We are continuing to search for a suitable student/postdoc and have made many contacts with various professors. We will continue and hope that we can succeed eventually. We recently have connected with Prof James (Jim) Franson of UMBC. He mentioned that he had a very good quantum theory student graduating this spring – who may be interested in NIST. Since this student would be more suitable in the theory projects of the group, I would like to forward your contact information to them. They can then reach out to you directly.

Thanks  
Ollie S.
