Sounds good to me – I'm happy to give it another shot when there's an appropriate opportunity.

Alas! We have been spurned. I do think the idea of having a topical session at an optics conference is a good one. People at the QC conferences will be more familiar with this field already. Maybe FIO? Or Photonics West?

Hi Krister –

Thanks for putting together our attempt – it would be great to try again some time at a different venue. I'm interested in unifying more with the optics community and I think there's a good deal of interest among the community (including the folks at www.tyqi.org).

Too bad this didn't go through, but perhaps we can try again at a different conference. Thanks for all the hard work everyone.

Subject: CLEO:2018 Symposium Proposal Status

Good Afternoon Lynden Shalm,

Thank you for submitting your symposium proposal for CLEO: 2018. The Program Chairs received many outstanding proposals and could accept only a limited number. Unfortunately your proposal (*Advances in Photonic Quantum Randomness*) was not one of the few selected by the committee.

We hope that you consider submitting a Contributed Paper for presentation for CLEO: 2018. The submission site will open by September 2017, and the deadline is 13 December 2017.

Sincerely,

CLEO Management
