Follow Up Flag: Follow up
Flag Status: Completed

Numbers below are correct and yes, limited to buffet and fountain soda only for the \$15 ticket.

P.S. I've asked FBC to make the changes to PQC that we discussed. I anticipate having back the quote sometime this week.

Subject: Lunch Fees @ NIST for Lightweight Crypto

Hey Mary Lou,
I'm meeting with the Lightweight Crypto team this morning to talk budget numbers for their November meeting. I want to have the right information.

Having just done Threshold, I recall the following:

- private lunch is \$22 + service and tax
- go through the café, it's \$15 + service and tax

Are these still good figures to work with? What are the limitations with the \$15? Buffet and fountain soda only? Or can they get a burger and fries, etc.

Thank ya!
