Dave & Morrie—

The corrected file is now online. You'll probably just need to reload it in your browser to see the change.
https://nvlpubs.nist.gov/nistpubs/SpecialPublications/NIST.SP.800-208-draft.pdf

Hi Jim,

Yes, that seems to have fixed it.

Thanks,

Dave

I went to Figure 2 in Word, selected all the cells (except for the left column), right-clicked to open Table Properties, selected the Cell tab, then Options, and un-checked "Word Wrap"; I also set all text in that table to 10pt instead of 10.5pt. That appears to have fixed it. Let me know if the attached PDF looks

better—hopefully this one change didn't alter anything else. :-/

Jim

Hi Jim,

(b) (6)   I took a look at Draft SP 800-208 and noticed one problem with the PDF -- Figure 2 is not formatted correctly. Figure 2 was formatted as a table, and many of the entries in the table were wrapped in the PDF so that that closing parenthesis appears on another line. The table looks fine in MS Word (both on the Mac and in on-line version of Word), but for some reason it didn't come out the same way in the PDF.

I understand that the document was posted last week, but would it be possible to re-create the PDF and then upload a revised version?

Thanks,

Dave

> Hey Morrie-
> Thanks for sending the two files to me. I'm not sure what you're seeing, but all of the headings looked good to me. I used "NIST SP on stateful HBS-8.docx" that you said is the current draft on the SharePoint site, accepted all changes, deleted the comments, and saved as the attached Word file. I then converted it to PDF—also attached. Please review the PDF to make sure it looks good. I'll then ask Matt Scholl if it's ok to post. If so, we'll put it online tomorrow (I put "December 11" as the comment period start date).
