OK, I'll take this with me tomorrow afternoon. Yes, the website will need to be updated with the new information.

I'm not here tomorrow. My questions are just:

1. What does a user have to do different? It seems so far just use the different email address.
2. How does a user access the archive?
3. Anything else we need to tell the user?

When we switch we'll obviously need to update our PQC page instructions for how to sign up. Let me know if you get the answers and we can do this next week. Thanks!

Dustin

Yes, that is true – I forgot that little tidbit.:) I'm going to go to their open house tomorrow afternoon. I requested my account today.

I'm not sure about the archive URL. From the handouts it looks like it would be something like: <https://groups.google.com/>..... But yes, if you make the archive private, they would need be a subscriber and log in with a google account.

If you aren't here tomorrow afternoon for the open house, and have some questions, let me know – I'll take them with me.

That's good to know (about user shouldn't see a difference). Although in Justin's email to me, it says they need to mail to a new address: pqc-forum@list.nist.gov instead of pqc-forum@nist.gov.

I think to access the archives they visit:

<https://list.nist.gov/pqc-forum>

and need to be a member who is logged in. Does this seem right?

That might be a question for Justin. Pqc-forum hasn't already migrated over yet, right? It might be as easy as sending an email to the list stating that it's moved to Google Groups (users shouldn't see a difference) based on what I heard at the 10/6 talk which was:

people can receive and send emails to the list as usual; however, if they want to use the online interface and view archives, then they need to get the Google account.

I do have an account, and I've tried it out. I was wondering what's the best way to get everyone to use it?

Hey Dustin,
Now that the ATO was approved, did you get your NIST/Google Groups account set up?

Google Users,

On Saturday we received NIST-wide approval for using Google apps, your NIST lab members can request Google accounts here: <https://psd.oism.nist.gov/google>. Others outside NIST can request Google accounts here: <https://accounts.google.com/SignUpWithoutGmail?hl=en>

We will have the next Google user meeting in Lecture Room B at 2:30pm Eastern on Friday, November 3rd. This meeting will be VTC'ed to 1-1107 in Boulder. If you would like me or Zak to come talk specifically to your group, let me know.
